January 2014 – December 2014

Superintendent of Police E. Bryan DalPorto

Report submitted by Deputy Superintendent of Police Carlton L. Cain

FOR DISTRIBUTION TO ALL ESSENTIAL POLICE AND CITY PERSONNEL OR THOSE OTHERWISE AUTHORIZED

**This report has been completed pursuant to the Niagara Falls Police Department Risk Assessment Policy.
General Order 123.20 XII-J (Effective Date 10/14/2013).**

City of Niagara Falls Police Department January 2014 – December 2014

I am pleased to share the Niagara Falls Police Department's Risk Assessment Report for 2014. As an accredited department, the Niagara Falls Police Department has collected data on complaints, use of force, and vehicle accidents since 2011. This information is used as an analytical tool for our decision making process.

Excessive uses of force claims are inclusive in this report. Force, though rarely used, is an unfortunate aspect of protecting our citizenry. As the report describes, Niagara Falls Police Department officers apply force in less than **0.43%** of all calls for service and less than **6.06%** of the time while making arrests based on the total number of arrest for 2014.

While using force appropriate to the situation, it must be effective and reasonable. As such, that judicious use of force carriers lower risk of injury to the subject and officers. We use this report and others to make intelligence-led decisions on the best practices in: force management, policy, training, supervision, investigation, and review of allegations of excessive force.

After careful analysis of all 2014 risk assessment data, the following analysis yielded the following:

- Calls for service saw a **5%** increase and arrests were up by **24%**.
- While use of force incidents saw a **55%** increase, use of force actions taken saw a **9%** decrease. In perspective, NFPD officers were more effective in using force to affect an arrest in 2014.
- Total complaints saw a drop by **44%** in 2014, with only **16** citizen complaints for the entire year. Considering the increased calls for service, arrests, and use of force incidents, the 44% decrease in complaints is an especially positive statistic for the NFPD.
- Use of force incidents in the City Jail saw an increase from **3** in 2013 to **35** in 2014.
- The majority of use of force incidents occurred when dealing with mental evaluations in 2014. This is becoming a national trend as of late. As a result, NFPD is implementing training with mental health professionals in 2015 to addressing the needs of the subjects and proactive training for the officers.
- NFPD officers had to use force against armed suspects **49** times in 2014. This is a **408%** increase from 2013.

I personally thank the Professional Standards Unit: Lt. Thomas Licata, Detective Daniel Bird, Officer Paul Kudela, and Officer Patrick Clifton for the mature, thoughtful way they contributed to this report. Their perspectives, analysis, and commitment to the professionalism of this report is beyond reproach.

I particularly thank the consent decree team (Warshaw Group) for their leadership and hard work. They have provided both articulation and unique perspectives. Under their leadership, this review can become a national model for police oversight committee throughout the United States.
