RE: Comcast Letter of Agreement for the Niagara Falls Train Station

Dear Sir/Madam:

Amtrak is currently engaged in a Wide Area Network ("WAN") Transformation project. The objective of that project is to implement Network Upgrades and Expansions to meet the enterprise needs for higher security and great capacity. The first phase was to complete the WAN backbone design and then increase bandwidth. This has provided Amtrak's network with the necessary redundancy and bandwidth to meet the requirements for large capital initiatives.

The second phase of the project requires Amtrak to conduct a site readiness assessment of the 500+ branch locations, of which 283 sites were identified as needing a circuit upgrade and increased bandwidth in order to meet the strategic capital roadmap.

The Niagara Falls station is one of the Broadband sites included in the project. The enclosed Letter of Agreement constitutes your consent to access the property and proceed with installation or maintenance by the Local Exchange Carrier to deliver service to the Niagara Falls station. Please sign the Letter of Agreement and forward to Comcast at the address at the top of the Letter of Agreement.

If you have any questions or concerns please contact Stewart Waller at 202-748-4739 or by email at stewart.waller@amtrak.com.

Thank you in advance for your cooperation.

Yours truly,

A handwritten signature in blue ink that reads "Virginia Hart".
