### **Rental Rehabilitation Program / Investors**

The City recognizes the fact that, in the current rental market, it is often economically infeasible to keep up with all repairs that accumulate over time on rental properties. In an effort to make property improvements affordable, the City will provide investor owners a deferred grant in the amount of 50% of the funding needed to make necessary improvements. No repayment is required unless the owner sells or transfers title to the property within five years. After five years there is no repayment required. The maximum level of City funding is \$50,000.00 per property (\$25,000.00 maximum per unit), plus an additional \$5,000.00 per each additional unit and \$20,000.00 maximum for the lead-based paint hazard control. After rehabilitation the owner must agree to restrict rents so that the rents will be affordable to low and moderate income households.

To apply, applications must meet the following basic requirements: The property must be located within the City's Community Development target areas, the owner must own the property with a deed and property taxes must be current and paid to date.

#### **General Rehabilitation Standards:**

*The property will be inspected to determine the scope of work. The work is prioritized to eliminate health and safety issues, correct code violations, make the home more energy efficient, and other cosmetic improvements. Staff will provide written specifications for all work contracted through the program. The work will be bid out to a list of approved qualified contractors. Final payment to the contractor will only be made after the work is 100% completed and approved by the appropriate inspectors. This procedure is required to assure the quality of workmanship, all housing standards including HUD requirements and local codes are in compliance.*
